

SPORTS

Sound absorbing and shockproof

Granuflex's circular rubber floor and wall coverings are used in a diverse variety of sports facilities all over the world. Users love them because they help to avoid injuries and they increase comfort during sports.

Granuflex rubber products are beautifully finished and are made entirely from recycled rubber. They absorb sound and vibrations, they are anti-slip and they boast a particularly long life. And because rubber is impervious to the effects of moisture, sunlight and frost, it can be used both indoors and outdoors.
